## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 29, and 30, drawn to method of treating HIV, classified in class 514, various subclasses. Further restriction and election of species will be required.
  - II. Claims 8-28 (in part), drawn to compounds and compositions of formula IA wherein:

**R<sub>1</sub>** is unsubstituted or substituted isothiazolyl; unsubstituted or substituted thiazolyl; unsubstituted or substituted thienyl;  
**R<sub>2</sub>** is a group having R<sub>5</sub> as a monocycle with **no** heteroatom, and **no** two of R<sub>6</sub>-R<sub>9</sub> can form a ring,

classified in class 548, subclasses 146, 206; also 549, subclass 59+.
  - III. Claims 8-28 (in part), drawn to compounds and compositions of formula IA wherein:

**R<sub>1</sub>** is unsubstituted or substituted tetrazolyl; unsubstituted or substituted triazolyl;  
**R<sub>2</sub>** is a group having R<sub>5</sub> as a monocycle with **no** heteroatom, and **no** two of R<sub>6</sub>-R<sub>9</sub> can form a ring,

classified in class 548, subclasses 250, 255, 262.2.

IV. Claims 8-28 (in part), drawn to compounds and compositions of formula IA

wherein:

**R<sub>1</sub>** is unsubstituted or substituted imidazolyl; unsubstituted or substituted pyrazolyl;

**R<sub>2</sub>** is a group having R<sub>5</sub> as a monocycle with **no** heteroatom, and **no** two of R<sub>6</sub>-R<sub>9</sub> can form a ring,

classified in class 548, subclasses 347.1, 364.1.

V. Claims 8-28 (in part), drawn to compounds and compositions of formula IA

wherein:

**R<sub>1</sub>** is unsubstituted or substituted pyrrolyl;

**R<sub>2</sub>** is a group having R<sub>5</sub> as a monocycle with **no** heteroatom, and **no** two of R<sub>6</sub>-R<sub>9</sub> can form a ring,

classified in class 548, subclasses 517, 518.

VI. Claims 8-28 (in part), drawn to compounds of formula IA that are not covered in groups II-V, classified in class 540, 544, 546, 548, 549, various subclasses.

Further restriction and election of species will be required.

The inventions are distinct, each from the other because of the following reasons:

The inventions of groups II to VI differ from each other because each group is drawn to a ring system that is distinct and patentable over each other. Essentially, these are five

Art Unit: 1624

independent inventions as compounds of one group can be utilized alone, and not in combination of those in other groups. Note, with a variable core as such, the common property is not enough to keep five groups in the same Markush claim. Furthermore, a prior art that renders obvious one invention would not do so to the other. Thus, restriction for examination purpose as indicated is proper. However, should applicant traverse on the ground that the five groups are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the five groups to be obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the invention unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Inventions group I and groups II-VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, other compounds can treat HIV as well (e.g., AZT, ddI, etc.).

3. A telephone call was made to Mr. Leonard Svensson on 3-27-03 to request an oral election to the above restriction requirement, but a written restriction was preferred.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1624

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
